80%	90%	70%	60%	40%	40%

Forecast for Saturday 04 Nov 2023

Weather: Rain, often heavy, will clear northwards later this morning. Frequent showers will follow, along with limited bright spells, with some of the showers heavy and possibly thundery. This evening low cloud and patchy light rain or drizzle will replace the showers.

Chance of cloud-free hill tops above 600m: 20% until late morning and again this evening, becoming 80% in-between.

Low cloud and visibility: Cloud broken to persistent above 500 or 600m with the rain this morning, and 400 to 500m with rain this evening. In-between these times cloud lifts and breaks, with very good visibility and distant hills visible, although showers will bring patchy cloud temporarily down to 500m. Visibility very poor with hill fog, and limited to close hills with rain, showers and drizzle.

Meteorologist's View

Significant windchill. Difficult walking conditions with hill fog at times and saturated ground with full water courses.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Sat 04 Nov 2023	0.2mm	10.4mm	35.8mm

Forecast for Sunday 05 Nov 2023

Weather: Low cloud and patchy light rain and drizzle overnight. Through the morning becoming dry for a time with bright or sunny spells, before scattered showers arrive, some of which could be heavy with hail and thunder. Through the evening showers mostly die away, clear periods develop and valley mist and fog may form.

Maximum wind: West or Northwest 25mph, gusts 40mph.

Chance of cloud-free hill tops 600m: 20% increasing 80% though the morning, then 100% in the evening.

Low cloud and visibility: Broken or persistent cloud above 400 to 500m then lifting and breaking above the summits through the morning, except temporarily patchy cloud arrives above 600m with the showers. Generally very good visibility between showers, with distant hills visible, although sudden reductions in showers.

Temperature: **Valleys:** Plus 3C rising to 9 or 10C.
At 600m: Plus 4 or 5C.
Freezing level: Above summits.
